Forecast For Southwest England
Issued by Met Office Exeter
at 0400 on Monday 01 Mar 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Frequently sunny, before turning cold and wet midweek.

Today:
Fog patches, mostly confined to the east of the region, may linger briefly into the morning. Once cleared, this leaves a fine and dry day with plenty of sun. Remaining mild, particularly under any sunshine. Maximum temperature 13 deg C (55 deg F).

Tonight:
Fog reforms into the night, at first in the east but gradually moving westwards. Some western areas stay clear however, and here frost is likely to form. Chilly. Minimum temperature 2 deg C (36 deg F).

Tuesday:
Any cloud and lingering fog to the east soon breaks up, to give a fine and sunny day. Cloud and showers then approach from the south during the evening. Maximum temperature 11 deg C (52 deg F).

Outlook for Wednesday to Friday:
Becoming cold and cloudy, with showers of rain on Wednesday. Then turning drier Thursday, though still with some patchy light rain. Cloud cover then become patchy, giving sunny spells Friday.
